

On filtering ilitakuwa ionekane mda wote baadhi ya field za filter kwamba kusiwe na button kwamba mpaka a click ndo zile filter zionekane inatakiwa kwamba na dashboard pia inahitajika filter kwaajili ya baadhi ya status, kuliko kuwa na button ya filter kuwe na default pia kunaweza kuwa na advanced ambapo ndio itakuwa na all other filter so hapo tuonyeshe parmanent and zile basics then kluwe na advance ambapo itakuwa na expand au dropdown

## Proposal page

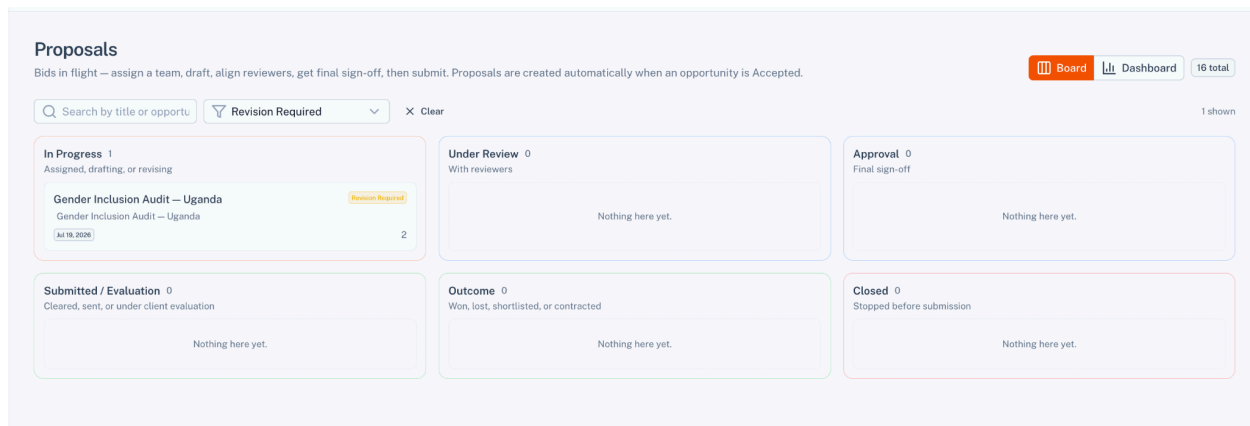

Baadae sijui kama niliinclude kwenye activity kunatakuwa kuwe na page ya analystic and reports ambayo mtu anaweza kuwa anapull hizo information (alisema baada ya kuobserve ile page ya win and loss)

Kwenye page ya proposal pia kuwe kama kwenye oportunity kuwe na board kwamba mtu aweze kupata ile overview lkn pia kwenye proposal ukifanya expansion na ikatokea page moja ikawa ndefu af ikamfanya mtu ascroll mpaka chini kuikuta card nyingine inakuwa sio vizuri ko labda kuwe na uwezekano awe anaweza kuswitch between the cards lkn pia aweze kufilter kwamba aone list ya inprogress, au underreview koz wa sasa akifanya filtering zile board zinaonekana zote in which ni very clipy and bouring

So tunaweza kuweka like kuwe na tab styling labda kwamba kila kard holds its own page koy kama zikiwa nyingi page itakuwa mbaya lkn I think tunaweza fanya like kwenye oportunity kwamba kuwe na board kwamba anataka apate ile board view kwamba kipi kipo wapi pia awe

na uwezo wa kuwa na ile list kwamba saiyo nataka kuiona list ya inprogress pekee au under review labda kwasabu filter tuliyoweka inafilter ndio lkn card zote zinaonekana

Ingefanya kati vizuri kama ingekuwa kwenye listing kwamba ambazo zimko under review zingekuwa zenyewe tuu au in progress zingekuwa zenyewe tuu. Kwasababi ni board basi ucheze na kushow or hide them kuzi na inayonyesha board zote 0 0 0 0 which haijakaa poa

Kuna tab ambayo inasema closed hapo sikuelewa inamaana gani?

On proposal ambayo imetoka kwenye opportunity

Kwa upande wa kulia tumeandika team instead of defining reviewers, writers and whatever, kwenye system inawezekana mtu akawa anaadjust review wanatakuiwa wawe wangapi katika proposal?? Nikasema hapana nikasema nitaweka hiyo flow ya customization in system wise by default

So akasema: nataka by default kuwa na watu ambao watapewa hiyo permission and roles kwamba wao wanaweza wakareview proposal wengine wanaweza kuwa ni team lead na nini hii haina shidha ya kuwa na roles once umekuwa assigned ni team lead hiyo proposal unakuwa unaisimamia na final approval hiyo nae ni permission kwamba huyu mtu atakuwepo pale atleast watu ambao wamepewa reviewer na wakasema kwamba kwenye kila proposal atleast watu wawe 3 wanareview na atleast mtu mmoja ni final approval means alipewa permission atakuwa anaapprove hizo proposal na mtu ambaye alipewa permission ya kureview means anaweza akareview hizo proposal. Means kama kazi imeandikwa na kutuma basi wote ambao wamepewa kazi ya kureview watatakiwa kureviw ile püroposal

So instead of separate between kwamba ni writer, reviewers ambao tumeandika contributors an wote wanatakiwa kuhesabika ni group moja la watu ndani ya hii proposal kinachofanyika ni kwamba mtu ambaye ameitengeneza hii opportunity yeye by default anaweza akawa ni proposal lead unless sasa mtu ambaye anapewa permission ya kucheza nani ni proposal lead ndie anaweza kubadilisha nani atakuwa ni proposal lead then watu wengine ambao watakuwa added kwenye hiyo proposal wao ndio watakuwa wanapewa class tofauti tofauti kama umekuwa added by default wote ni collaborators au contributors wanakuwa na permission ya kufanya editing mfano

unaona kwenye google docs kuna kuwa na mtu anayemiliki documents af kuna wengine wamekuwa wamepewa permission ya kuandika na kuedit na wengine wanakuwa wamepewa permission ya kuvuwa tuu na mwingine amepewa permission ya kutoa comment tuuu

Koo hii sehem ya proposal wote ni contributors na collaborators lkn kuna watu kwenye system wise wamepewa permission kwamba wanaweza kufanya review ya proposal wanaweza kuwa aprover lkn team lead ni mtu ameto ka kwenye oportunity unless kuna mtu juu yake anaweza kumuondoa kwenye proposal au kumbadilisha kwamba huyu hatakuwa team lead tena atauwa ni normal editor wa kawaida au just view na mtoa comment tuu na lead akawa mtu mwingine anayefanya hiy anakuwa ni mtu kwenye role ya juu zaidi ya yule aliyetengeneza proposal

Nikamuuliza je Kama nimekuelewa vizuri ni kwamba this breakdown ya users kwenye proposal niiondoe??

Majibu: yaani sahihi usihesabie team ya writing na reviews tuhesabie kwamba anyone atakayekuwa added tutakwaita wote eidha ni colaborator au contributor lkn kuna mtu ambaye ni lead by default kila mtu ajue kabisa mtu flani ni lead wa hii proposal halafu wengine unaweza kuwa unaadi ambao permissionzao lwanaweza kuwa editor manake for now unaweza kuweka hizo mbili kwamba kuna team lead na wengine wanapewa castly ya kuedit na wale ambao wanapewa kuedit mtu anayepewa kuedit anaweza kuwa ni reviewer

Nikauliza tena: sasa kuna zile role za system ambazo tumeshazifanya tayari hizi role within the proposal kwamba kuwe na interface yake ya kudefine hizi role according to proposal ama hizo role ziwe define hapo hapo kulingana na proposal kwamba lead ndio awe anadefine hizo permission??

Majibu: inabidi iwe na interface yake pembeni actual ni good point zinabase kwenye role and permission lkn ukiziweka kwenye role and permission means kwamba mmoja unaweza sema ni owner au manager wa proposal kwenye porposal wewe ni lead halafu nyingi ne inakuwa ni proposal editor koo mtu anaona kabisa wewe ni proposal editor koo akiwa anaada anaona zile permission ambazo zinahusika nan proposal tuuu ambapo kuna lead na proposal editor ila hizo permission nyingine kama system admin sijui manager hizo anakuwa hazioni kwasababu hazihusiani na proposal

Nikasema asijamuelewa yeye akanielekeza tena hivi:

Turudi kwenye roles na permission ambazo tunazifanya kawaida kwamba tumedefine af tunakuja kugive permission so tunaweza kutengeneza roles ambayo permission yake ni specific kwaajili ya proposal kwamba hiyo permission zote hazipo inakuwa hiyo permission tukija kwenye proposal lead tunaweza kusema permission yake ni writting na kuinvite members wengine halafu kuna wengine anakuwa ni editor wa proposal anaweza asipate permission ya kuinvite wengine lkn akawa na uwezo wa kuedit proposal

Nimakuuliza: Ulisema yule anayecreate oportunity by default ndie anayekuwa proposal lead

Majibu: Yes yeye ndo kwasababu ametengeneza hiyo opportunity basi ndie anayekuwa lead wa proposal unless kwa baadae tukimlement AI then kwa vile hazlitakuwa na mtu ambaye ametengeneza inakuwa ni system generated then hapo mtu anaweza kusema ngoja nimuassign mtu filan ndo asimamie

Nikauliza: appart from AI ambayo itakuja baadae je who has a poermission of creating a opportunity koz kama ni kila mtu anaweza akacrete oportuntty basi ni kila mtu atakuwa na hiy permission ya kuandika au edip proposal so itakuwa hakuna restriction ya nani aandike nani asiandike

Majibu: Ndo maana nikasemaje kwenye permisiion kuna kuna na mtu anakuwa na permission ya juu ya yule anayetengeneza, ambaye inamfanya kuwa by default as a lead wa proposal then so the one above anaweza kuwa revoked na kupewa mwingine koz inaweya kutokea kwamba anayewekwa by default hafai kuwa lead maybe be awe editor labda na lead awe mwingine

Nikauliza: So apart from admin ambaye na permission zote it means lazima kuwe role inayojitegemea kwamba na rolke inayojitemegea kwamba huyu ni proposal manager conroling who is lead and who is not

Majibu: kuwa proposal manager ni just kutakuwa na hiyo permission kwamba nani anaweza kuchange how is lead of a proposal. Huyu atakuwa na permission ya juu ya kuweza kuchange permission of any in proposal koz sio kila mtu ataingia kwenye proposal yeyote bali wale ambao watakuwa invited au added kwenye hiyo proposal na kuona progress ya hiy proposal na anything kinachoengelea lkn kama hayupo added au invited means hawezi kuona chochote kinacho endelea means even kwenye listings ya page za proposal mtu ataona zile zinazomuhusu kulingana na permission unless labda amepewa permission za kuona proposal zote

Mpangilio wa UI kwenye proposal pale kwenye section za proposal:

Anasema: instead or kutengeneza section like hivyo, kwanza inaboa, pia inafanya page iwe ndefu na mlolongo mrefu sanaa so kitu unaweza fanya tunaweza include zile editors ambazo zinakuwa like world au docs inakuwa na flexibility kwamba mtu anaweza kupandilia vile yeye mwenyewe zile section anavyoona yeye na atakuw anazona kwenye view moja instead of this section umeziweka koz kila mtu atakuwa na section na button ya kusave kweli inakera. Iilitakiwa iwe editor kwamba tunaweza kutumia Quill, CKEditor, TinyMCE or Tiptap ili kuelewa na flexibility ya kila mtu aandike according to hiy style na iliwemo kwamba sio proposal zote zina same structure.

Af pale niliweka zile tabu za in system, documents or both ile haitakiwi inatakiwa tuwe na hiyo space ya editor tuu lkn pia kwe na sehemu ya kuadd/attach documents by default. Proposal document ipo sawa ila haitakiwi tufilte kwa juu iwepo tuuu pale by default

lakini pia left side and bottom tuiopangilie ili kwaba isionekane tumejaza vitu vingi sehemu moja mfano kungekuwa na tabs juu za kutofautisha hizo card zote mfano team iwe na tab yake pia

labda na ile time line ingekuwa na tab yake, poa ile brainstorming messages tab ndo ingekuwa upande wa kulia wa proposal isijifiche chini koz sio kila mtu anascroll mpaka chini

And kwenye hiyo tab ya onboarding messages ni kwamba inakuwa like a whatsapp group chats conversation kwamba anyone invited on a proposal can text and leave a comments kwamba when other come can see what ameandika nn kwa mda gani list like a whatsapp message In kwa vile hii inabackground ya aina moja tunaweza kutofautisha a personal text by colors maybe or their name lkn iwe tuu vizuri na muonekano mzuri na tunaweza kuiweka ikawa inaitwa comments sections or whatever the word it feet

And with that ni kwamba ile editor tutakayoweka iwe na limit ya height isiwe inaexpand page kupitiliza tunaweza kuipa maximum height flan then ili kwmaba iwe na internal scroll ya hiyo editor

Lkn pia list of documents sehem ya kuona documents zilizipo tunaweza kuweka on left side below comment section pia ambayo ikawa drop down au inaweza kuwa tab or popup au inaweza kukaa chini ya editor koz tunaipa ile editor maximum height then tinaweza kuweka sehemu ya documents chini haitakuwa mbali sana mtu kuona kwamba hapa ni sehemu ya documents

Lengo la hii ni kwmaba tunataka all the pages zinazohusiana na proposal isionekane na vitu vingi an iwe clean so we can rearrange the way kwamba haiboi au mtu haitaji kucrol sana ili akute kitu kingine so we can put things into tabs, or drop down au vinaweza kuwa expandable na release yaah link proposal section ya kuedit inabadi hapo hapo na hiyo comment section

inakuwa on left side pale ambapo tuliweka team

Najua uko vizuri kwenye upande wa design na arrangement then tunaweza kufanya kitu bora sana kila mtu akaipenda na ikawa rahisi zaidi kwa watumiaji means

Nikauliza: Kunakitu excel ilikuwa inataka kwmaba kuwe na inline comment ya sehem husika wakati wa documentation ya proposal

Majibu: Akasema hiy inaweza kuwa ngumu lkn tuangalie kama inawezekana koz mostly ipo kwenye google docs sinahakika kama editors nyingine inahiyo functions so kama haiwezekani basi we skip lkn kama inawezekana kuipata hiyo inline comment kwa editor tutakayotumia basi its fine

UI ya uportunity + proposal:

Akasema board and listing ziwe na search chini yake by default isiwe ile ya kwenda kwenye filter button ameelezea hapo tuu lkn pia akasema kuwa na hizo column tatu inaweza kuwa mkanganyiko sijui kama inawezekana iingekuwa in form of tabs one anaswitch between tabs for pending, accepted or rejected

UI ya page ya Proposal:

Kwanza ni zile arrangement ya cards ya inprogress, under review kuzionyesha zote kwa pamoja ni page cripy and inachanganya kipi ni kipi so na penyewe tuangalie namna ya kuweka

inform of tabs lkn pia pawe kama kwenye oportunity pages kwamba kuna onboard and listings mapoja na maelekezo ya filtering

Nikauliza pia: kwenye proposal pale je ni kila mtu akiingi aone proposal zote ama kila mtu anayekusika na proposal aone proposal zinazomuhusu tu??

Akasema I think thats is better kwa mfano tumemwingiza mtu ambaye yupo outside the company and ameingia kwenye page ya proposal anakuta vitu vingi proposal nyingi anaweza kuleack au kuiba some of the information sio kuwe na hiy limitation kama mtu hausiki na proposal yeyote basi asione proposal tab kabisa na kama anahusika basi aone zile tuu zinazomuhusu that means hata page ya proposal inatakiwa kuwe na mpangilio mzuri sio kuonyesha card zote vile ni usubufu and bouring for real

Au tumemuingiza outsider anaingia kwenye proposal anaona in progress, underreview, approved na yeye maybe ana proposal moja ambayo ipo on progress af anaona vitu vingine lama approved au under review lazima atajiuliza why hizi nyingine sizioni na itamchanganya pia so lazima kuwe na limitation ya nani anaona nini na page inadisplay nn kwa wakati gani kulingana na users au session

So kwa watu ambao watakuwa wanaweza kuona vitu vingine au proposal nyingine ni wale ambao labda wana insystem proposl permission au wale ambao wako invited kwenye proposal husika wanaona zinazo wahuu otherwise tuisumbue wengine kuona visivyowahusu.

Lkn pia mfano kuna mtu amepewa permission ya kufanya review tuu labda husu tunamlimit aone zinazohusiana na review tuu na sio inprogress au mwingine ni writer pekeake so anaona inprogress na zile zinazomuhusu tuu or kama so everything kikiwa according to permission pia hata security itakuwa vizuri zaidi

Lakin pia mfano inprogress zimefika 100 under review 100 approved 100 and nyingine 100 hiyo page haitakuwa na afya tena so tuwe very much and world class creative katika kuarange hizo pages na its contents

Nikauliza: suppose writers kwenye ile proposal editing ni zaidi ya wawili how can we differentiate nani kaandika nn na nini?

Majibu: page wanayoandika ni moja ila wanauweyo wa kucolaborate wanacho kiandika pale just like google docs lkn kuna editor zinaweza kusupport hicho kitu kuna namna kwamba tunaweza kuimplement iwe inasupport real time editing kwamba unaona huyu anaedit hapa na mm naedit hapa so tuangalie namna ya ku implement

Kwenye proposal sasa upande wa reviewers:

Hapa ni stori ile ile sema as proposal writing pages and page inaonekana na vitu vingi sana so tunaweza kuangalia pia kipi kikae kwende drop down, kipi tab, kipi left an page isiwe tu much boring

Tukija upande wa reviewers instead kuwa na vicard vingi vingi vya approve, reject ama kuwe na button mbili tuu approve au reject au changes required af inaweka feedback kwasababu tuitajenga part ya comment ambayo itakuwa common kwa watu wote wanaohusika na hiyo proposal then feedback atatoe kwa njia ile ya charting tutakayo iunda kusiwe card nyingine ya feedback

So the process inakuwa ni kwamba reviewer akiclick approve message inajiandika kwenye charts kwamab mtu flan ameapproveau kama akiclick changes required basi iende message automatic kwenye charting kwamba flan amesema changes required then kama kuna kuna text ya ziada nataka kuituma then anaweza kuiandika pia akatuma

Feedback

Explain your decision...

Kwa kufanya hiv means that ile section ya your review inapotea kabisa na hiyi button zinaweza kukaa eidha juu au chini ya section ya proposal koz yeye atakuwa anaiangalia na kureview ambapo hiz button zitaonekana kwa reviewer tuu na sio wote

Pia reviewer alignment inaondoka koz wote watakuwa wanaona on converstation chat husika ya hiyo proposal

So maybe kwa kurahisi kwenye ile chart converstation tunaweza kuweka filtering kwamba reviewer anataka kuona reviewer yupi ka aprove au wangapi wamefanya review so kuna kuwa na differentiation flan iv kwmaba hii ni text ya kawaida mtu kashare au hii ni reviewer choices ili iwe rahisi kurahisisha mtu kuelewa what is what Just be a world class creativity on this

So isiwe sehemu ya kikadi kuwe na sehemu tuu ya button kwamba anasoma au anaclick too accept text inaenda au anaweza include a short text kulingana na choice aliyoshangua au button aliyoclick or kama hana text ya ziada then inaenda tuu nimeaccept au nimereject lkn kama akireject then ni must atoe reason ni why amereject

So kwa kurahisisha ili kusiwe na vitu vingi tunaweza kuweka review button ambayo aliclick inatokea popup ambapo itakuwa na option tatu hiyo approve, reject, au required changes with option ya message ambapo hiyo message inaenda moja kwa moja kwenye conversation charts au labda hana text ya kuadd then inaenda tuu flan ameapprove basi ila reject ni must for a reason

Nikauliza: tumeweka kwamba reviewers lazima wawe watatu and wote lazima waalign kwamba wakubali iko approved wote watatu ndio iende kwa final approver je ni lazima iwe hivyo ama tunaweza kuweka idadi kwamba a certain % wakiapprove then iende kwa final approver??

Majibu: watu wanaokuwa na watu wamekuwa set kureview unakuta ni mtu wa finance labda technical, operation au HR, watu kadhaa ambao ni lazima wareview waangalie kama imealign kulingana na kitengo husika so wanakuwa wanajulikana flan na flan ndo wanaweka kufanya review ya proposdal kwamba ndo wanaexperience ya kuandika proposal lkn pia inawezekana one of them anakuwa ni editor labda finance anaandika proposal so hawezi kujereview mwenyewe lazima kuwe na mtu extra kuangalia kama kilichoandikwa ni sawa na kimemeet standards (So lazima kuwe na limitation kwamba an editor hawezi kujireview mwenyewe)

Na mtu wa mwisho wa approval ndo yule final kabisa anaangalia kama imemit requirement hapa anaweza kuwa ni CEO au COO au MD or what ever.

So chakufanya sasa hapa ni kwamba tunaweza pia hii setup ya wangapi ndo wanatakiwa kureview ili proposal iende kwa final approver tungatengenezea settings yake special ya kudefine all of there limitation system wise or project wise koz inawezekana proposal flan ikahitaji reviewers watano, wengine watatu wengine mmoja tuu hivyo so just be a world class creativity

On final approver page as well

Story ni ile ile ya mpangilio wa page, ni eitha dropdown or tab or whatever is best an chakuzingatia uniformity and standard koz the page is the same isipokuwa tuu noi roles zinatofautisha nani aone nini na nini

Sasa kuna watu ambao watakuwa wanatoa update ya proposal imefikia wapi sana sana ni yule proposal lead koz once imefika kwa final approver kule ndo kunatolewa desicion sasa umewin proposal au umelose proposal yeye ndo anatoa update hiyo kwamba saiz tupo short listed au

tiupo kwenye status ipi na inafanyika kwenye ile ile conversation lkn pia hata reviewer anaweza toa update ya wapi proposal inaendelea au imefikia wapi na hizo update zinaweza kuwa even after the proposal is won koz baada ya kuwa won kuna sprint nzing hatijazimplement that explains what follows after won or loss

Lakini kwa final reviewers (evaluation outcomes) alifanya loss or won or short listed or clarification required then nae iwe in the same format kwamba kuna button flan akiclick inatokea pop up ambapo inampa hizo option zake kama final approver na kutoa hiyo feedback au comment or reasons ambapo kwengine inaweza kuwa ni optional japo ni vizuri ila rejecting and loss lazima kuwe na reason

Lkn kwenye hiyo option za final reviewer(evaluation outcomes) i.e shortlisted, won or loss au clarification required kunatakiwa kuwe na page yake special ya kufanya customization koz sio kila proposal itahitaji vitu vyote hivyo nyingine zitahitaji labda won or loss au nyingine zitahitaji zaidi ya hivyo mfano interview or whatever so there should be a special interface ya kufanya editing na customization ambapo inaweza kuwa proposal wisely ama system wisely pia ili tusijilock isiwe fixed iwe dynamic so tunaweza kuangalia namna ya kuliweka.

Nikauliza swali: Is it possible kwamba suppose the proposal imekuwa loss je inaweza kuwa reversed na kuwa won au won ikabadilishwa na kuwa loss??

Majibu: hapo ndo inakuja kwamba nani atakuwa na uwezo wa kuoverride hizo status, yamkini tumeanza na client mwanyzoni kufika katikati kaingia mitini au mmepishana in middle hapo ndo inakuja ile customization ya evaluation status so tunaweza kumpa mtu permission ya kuoverride status

Nikauliza: same wise kwa opportunity kwamba once mtu amereject au accept opportunity inatoka moja kwa moja inaenda kwe nye accept au reject nikatoka wazo kwamba suppose mmoja huyo kareview kaona kwake haieleweki akareject lkn yamkini hajaelewa what the oportunity is about then anakuwa like ameishusha thamani na inakuwa vigumu kwa mtu mwingine kwenda kwenye tab ya reject na kuangalia oportunity koz watu wengi wananotion ya kuona kwa ba koy ipo kwenye tab ya rejection then haifai kumbe it was still valuable how do we solve that??

Majibu: A good point ilitakiwa kuwe na mtu ambaye anaweza akareverse hiy permission, akasema kwamba tukiwa na count down kwamba ety system iangalie kama wengi ndo wamereject basi iende kwenye rejection lknikaja issue kwamba suppose number zipo number zipo even 2 kwa 2 itakuwa issue logic yake itasumbua sana sasa sijui tueke kwamba iwe ni count down kama wangap wameaccept ambapo tukifungua zile number tutaona wangap wameaccept na wangap wamereject na ni nani na nani na kwasababu gani. Lkn kwenye opportunity kunakuwa na watu ambao wanakuwa wamepewa review ya proposal lkn wengine wanapewa permission ya kuangalia proposal nakutoa reasoning ya ipi imepita na ipi haijapit akwasababu gani lkn hili tutalifanya baadae kwasasa iache kama ilivyo kwanza.
